

Your Ref: COR 2015 005622

12 July 2017

The Coroner  
DX212560  
MELBOURNE VIC 3000

Dear Coroner

### FINDING INTO THE DEATH OF WARREN GLOVER

Energy Safe Victoria (ESV) notes the recommendation made pursuant to section 72(2) of the **Coroners Act 2008**.

*'I recommend that Energy Safe Victoria issue a Safety Alert to registered electrical contractors in regional Victoria notifying them of the circumstances of this death and the importance of installing a residual current device protected power point or utilising a portable residual current device on a power point when installing or performing maintenance work on an external water pump.'*

ESV is the authority which registers electrical contractors and issues licenses to electricians for Victoria. ESV will write a safety alert and by September 2017 will;

- a. send a bulk email to all electrical contractors and all electricians for whom we have email addresses, and
- b. use the ESV website and social media to publicise the Safety Alert, and
- c. attach a copy of the Safety Alert to licence and registration renewals.

I trust that this meets the requirements of the Court.

Yours sincerely

*Roanne Allan*
