Delivered At: Lonsdale Street, Melbourne

Hearing Dates: 21 June 2010

Findings of: JANE HENDTLASS

Representation: S/C Kelly Ramsay

Place of death: 77 Mount Dandenong Rd, Ringwood East, Victoria 3135

FORM 37

Rule 60(1)

FINDING INTO DEATH WITH INQUEST

*Section 67 of the Coroners Act 2008*

Court reference: 3924/09

In the Coroners Court of Victoria at Melbourne

I, JANE HENDTLASS, Coroner

having investigated the death of:

**Details of deceased:**

Surname: ANDERSON  
First name: BRIAN  
Address: 7 Mount Dandenong Rd, Ringwood East, Victoria 3135

AND having held an inquest in relation to this death on 21 June 2009 at Melbourne find that the identity of the deceased was BRIAN ROYCE ANDERSON and death occurred on or about 12th August, 2009

at 77 Mount Dandenong Rd, Ringwood East, Victoria 3135

from

1a. CORONARY ARTERY DISEASE IN THE SETTING OF DOUBLE  
VESSEL CORONARY ARTERY DISEASE AND CARDIOMEGALY

in the following circumstances:

Brian Anderson was 50 years old when he died. He lived in a DHS Support centre managed by Australia Independence Community Solutions at 77 Mount Dandenong Road in Ringwood East.

Mr Anderson was a quadriplegic as the result of a driving accident in 1985. He had also recently suffered from a chest infection. His general practitioner was Dr I Sagi. On 4 August 2009, Dr Sagi prescribed antibiotics and a Ventolin puffer.

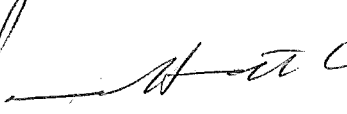

At about 9.00am on 12 August 2009, a personal care worker, Jana Majdalani, woke Mr Anderson and placed him on the commode. At about 9.05am, Mr Anderson said his chest felt awful as if his chest infection had returned. At 9.10am, Mr Anderson called out and staff noted his lips were blue and he had chest pains.

Mr Anderson then collapsed. Ambulance officers did not attempt resuscitation at Mr Anderson's prior request.

The forensic pathologist who performed the autopsy formed the opinion that the cause of death was coronary artery disease in the setting of double vessel coronary atherosclerotic disease and cardiomegaly.

Accordingly, I find that Brian Anderson died from coronary artery disease in the setting of double vessel coronary atherosclerotic disease and cardiomegaly.

Signature:

The seal of the Coroners Court of Victoria is circular. It features a central coat of arms with a shield, a crown on top, and two figures holding a shield. The text "Coroners Court" is written in a curve at the top, and "of Victoria" is written in a curve at the bottom.

Dr Jane Hendtlass  
Coroner  
21 June 2010
