M/s Leah Walsh

Further to the Report and related recommendations in respect of Mr Phillip Anthony Cullen (deceased), I advise that the Australian Hotels Association (Victoria) has circulated the attached Bulletin to members across Victoria.

The matter has also been the subject of discussion at AHA(Vic) Board and Council meetings.

Yours sincerely

Brian Kearney
Chief Executive Officer
Australian Hotels Association (Victoria)

Maintenance and safety of heaters and fireplaces.pdf

Advice ■ Support ■ Network ■ Influence

2012 AHA (Vic) – Bulletin 20

Monday 02 July 2012

MAINTENANCE AND SAFETY OF HEATERS AND FIREPLACES

With the winter well and truly upon us, members are encouraged to ensure adequate equipment maintenance and safety precautions for all heaters and fireplaces, particularly those in public areas.

All freestanding and in-built heating devices and open fireplaces should be effectively guarded to prevent staff and customers from coming into contact with any hot surface or flame.

Routine maintenance inspections should be carried out to limit the potential for fire caused by blocked chimneys and heating ducts.

AHA (Vic) members are encouraged to access trade suppliers from our associate directory via www.ahavic.com.au

Cheers,

Brian Kearney
